

The Hutch 9036i I-Beam Slider For Intermodal Chassis

An improved version of the Hutch 9000 2-pin slider, our new Hutch 9036i with 36" spring I-beam centers is specifically designed for intermodal chassis applications.

EZ-Pull lock pin mechanism with removable and replaceable pin cage.

Heavy-duty, cast rear hold-down clips.

Cast sidemount hangers have no hidden pockets for moisture to accumulate, making this the most corrosion-resistant intermodal suspension/subframe available.

Lighter-weight, higher-strength materials allows for greater payload due to a weight reduction of more than 100 lbs.

Huck "lockbolt" fasteners for the rocker hanger assembly that is virtually maintenance-free.

- Totally interchangeable with the 9000 2-pin chassis slide.
- Weight capacity rating up to 25,000 lbs/axle.
- The design, material, and welding/assembly process has been optimized to produce a durable, lightweight frame that offers years of trouble-free service.

The Hutch 9036i I-Beam Slider offers the superior durability, reliability and performance needed for your intermodal applications – and it is backed by Hutchens' on-time delivery, warranty, and commitment to after-sale support and service.
