

The Hutch 440 Single Point Suspension

Based on the strong history of the Hutch 900 with its modifications and upgrades over time, the Hutch 440 now begins a whole new chapter in suspension innovation with its totally new design “from the springs up.”

- Perfect for dump trailer hauling of solid waste, construction materials, bulk commodities, and other similar loads.
- Built for over-the-road applications and for handling tough terrain and operating conditions.
- A lightweight spring suspension that allows for greater legal payload due to its weight reduction of more than 120 lbs.
- System features the latest in parabolic taper-leaf spring design... and a polyurethane free-oscillating bushing is standard.
- Standard 38" spring centers, and wider spring centers are available.
- Weight capacity rating of 44,000 lbs.

The Hutch 440 Single Point Suspension offers the superior reliability, durability and performance that your fleet deserves – and it is backed by Hutchens’ on-time delivery, warranty, and commitment to after-sale support and service. And that’s really the point.
